

REMARKS

As filed, this application contained 80 claims. Upon entry of the above amendments, all previously pending claims will be cancelled. Applicants reserve the right to pursue those claims in this or a related application. New claims 81-117 have been added. These amendments add no new matter and are fully supported by the specification and claims as originally filed. Applicants respectfully submit that these claims are all directed to a single invention, namely an apparatus, for electroporating tissue, which should be classified in accordance with the now-cancelled claims corresponding to elected Group II. Accordingly, Applicants respectfully request consideration of new claims 81-117.

Dated: 12 SEPT 2003

Respectfully submitted,

By:
